## FORWARD-LOOKING STATEMENTS

Except for historical facts, all matters discussed in the Press Release attached to this Current Report, which are forward-looking, involve a high degree of risk and uncertainty. Certain statements in this Press Release set forth management's intentions, plans, beliefs, expectations, or predictions of the future based on current facts and analyses. When we use the words "believe", "expect", "anticipate", "estimate", "intend" or similar expressions, we intend to identify forward-looking statements. You should not place undue reliance on these forward-looking statements. Actual results may differ materially from those indicated in such statements, due to a variety of factors, risks and uncertainties. Potential risks and uncertainties include, but are not limited to, competitive pressures from other companies within the Educational Industries, economic conditions in the Company's primary markets, exchange rate fluctuation, reduced product demand, increased competition, inability to produce required capacity, unavailability of financing, government action, weather conditions and other uncertainties, including those detailed in the Company's SEC filings. The Company assumes no duty to update forward-looking statements to reflect events or circumstances after the date of such statements.

### Item 7.01 Regulation FD Disclosure.

See Item 9.01, Exhibit 99, regarding a Press Release disseminated on September 8, 2016, regarding the Company's BrickLAB product announcement.

The information contained in this Item 7.01 and 9.01 in Exhibit 99 is being furnished, and shall not be deemed to be "filed" for purposes of Section 18 of the Securities Exchange Act of 1934, as amended (the "Exchange Act"), or otherwise subject to liability under such Section 18. Furthermore, the information contained in this Item 7.01 and 9.01 in Exhibit 99 shall not be deemed to be incorporated by reference into our filings under the Securities Act of 1933, as amended (the "Securities Act"), or the Exchange Act.

### Item 9.01 Financial Statements and Exhibits.

(b) Exhibits.

FOR IMMEDIATE RELEASE  
September 8, 2016

PCS EDVENTURES ANNOUNCES BRICKLAB PRODUCT CHANGES  
Company Announces New BrickLAB Product Configurations and Retail Opportunity

Boise, Idaho, September 8, — PCS Edventures! Inc., (PCSV) a leading provider of K-12 Science and Engineering (STEM) programs and leader in the design and manufacturing of precision technology for drone racing and robotics today announced new product packaging and configurations for its popular BrickLAB product line that will expand its market potential.

The PCS BrickLAB product line is based around a high-quality plastic building block compatible with other major building systems including LEGO®, K'NEX®, Megablox® and others. PCS educators and product designers have worked together for a number of years to evolve the product into the perfect manipulative for hands-on STEM education. The new packaging configurations and expansion of colors streamline fulfillment operations for schools and also opens up new potential retail markets.

Heidi Grover, Director of Marketing and Development, said “We have been in pursuit of the ‘perfect brick’ it seems for years and we love this new product. We designed it with slightly rounded corners so there is less risk of sharp edges cutting students and teachers. We selected resins that are slightly softer and have less ‘clatter’ to them which makes for a quieter classroom experience. We selected a broad range of primary and vibrant colors that provide a colorful, engaging experience and appeal to all students. We engineered the clutch strength to be slightly higher than competitive products to enable more sophisticated building challenges. And we designed a very specific inventory of sizes to provide a rich platform for classroom projects. Finally, the new packaging for the BrickLAB BrickPACK is beautiful for retail display and configures the product into smaller modules for educators looking to expand their building inventory in smaller purchases.”

Jim Schmidt, Ed.D. who leads professional development initiatives at PCS Edventures said, “I have had the pleasure of working with educators and educational researchers now for a number of years, and the BrickLAB is one of the most versatile and useful STEM products on the market. In addition to the many volumes of curriculum that embed STEM education into the classroom and after-school settings, we have documented university research that shows how this product helps elementary teachers to become more comfortable with introducing STEM topics into the classroom.”

Learn more about the BrickLAB BrickPACK and associated accessories and curriculum at the PCS Edventures website. Click [here for a direct link](#) to the BrickPACK product.

**About PCS Edventures!**
